

Oncology Nursing Society Foundation

Research Classification Form

INSTRUCTIONS: Please check the boxes below which best describe the purpose and aims of your research proposal.

This information is needed by the Oncology Nursing Society Foundation to share with other cancer research funders who classify their research portfolios in the same way. This information is provided to the public on the International Cancer Research Portfolio Website at www.cancerportfolio.org. Funded studies that have been classified using this unified classification system, the Common Scientific Outline, are available on the website. Additional information on this form is needed for the Oncology Nursing Society Foundation's Grants Database.

Cancer Control, Survivorship & Outcomes Research:

- Patient Care and Survivorship Issues
- Surveillance
- Behavior
- Cost analyses and health care delivery
- Education and communication
- End of life care
- Ethics and confidentiality in cancer research
- Complementary and alternative approaches for supportive care of patients and survivors
- Resources and infrastructure related to cancer control, survivorship and outcomes research

Biology:

- Normal functioning
- Cancer initiation: alterations in chromosomes
- Cancer initiation: oncogenes and tumor suppressor genes
- Cancer progression and metastasis
- Resources and infrastructure

Scientific Model Systems:

- Development and characterization of model systems
- Application of model systems
- Resources and infrastructure related to scientific model systems

Early Detection, Diagnosis & Prognosis:

- Technology development and/or marker discovery
- Technology and/or marker testing in a clinical setting
- Technology and/or marker evaluation with respect to fundamental parameters of method
- Resources and infrastructure related to detection, diagnosis or prognosis

Etiology:

- Exogenous factors in the origin and cause of cancer
- Endogenous factors in the origin and cause of cancer
- Interactions of genes and/or genetic polymorphisms with exogenous and/or endogenous factors
- Resources and infrastructure related to etiology

Prevention:

- Nutritional science in cancer prevention
- Chemoprevention
- Vaccines
- Complementary and alternative prevention approaches
- Resources and infrastructure related to prevention
- Interventions to prevent cancer: personal behaviors that affect cancer risk

Treatment:

- Localized therapies- discovery and development
- Localized therapies - clinical applications
- Systematic therapies - discovery and development
- Systematic therapies - clinical applications
- Combinations of localized and systemic therapies
- Complementary and alternative treatment approaches
- Resources and infrastructure related to treatment
