

Calling for abstract reviewers!

Congress is just around the corner and with it is the release of the latest cutting-edge and innovative abstracts. Abstracts submitted are focused in areas of administration/leadership development, clinical/evidence-based practice, education, and research study.

As an abstract reviewer, ONS asks you to review abstracts and provide feedback on each abstract you review, within a very quick turn-around time period. You will provide feedback based on the abstract's significance, problem and purpose, interventions, interpretation, discussion, innovation, and general reviewer comments. **NOTE:** Reviewers with their PhD will be asked to review research study abstracts (abstract criteria is slightly different).

If interested in reviewing abstracts please send your name, email address, and area of review interest to [absquestions@ons.org](mailto:absquestions@ons.org) by Thursday, December 18. Please respond to this call no later than **Thursday, December 17 2009**.

For more information, contact, ONS Education toll free at 1-866-257-4ONS or please email [absquestions@ons.org](mailto:absquestions@ons.org).
