LEARN  
HOW ONS  
CAN HELP.

# LET'S IMPROVE PATIENT OUTCOMES **TOGETHER**

## **CULTIVATING A CULTURE OF NURSING EXCELLENCE**

The expert-driven resources at Oncology Nursing Society (ONS) are designed to get oncology nurses to the next level. Learn more about what we can do for you.

### **EDUCATION**

Provide your nurses with evidence-based educational offerings to stay current. ONS conferences, online courses, and journal activities deliver the knowledge your nurses need to provide optimal patient care.

### **COMMUNITY**

Connect your nurses to other oncology nurses from around the country and world on the ONS digital platform. The support they find with their colleagues will increase their confidence and job satisfaction.

### **STANDARDS AND GUIDELINES**

The ONS-developed standards and guidelines can be used throughout institutions and organizations to ensure quality care and a high level of education among nursing staff and other healthcare providers.

### **PUBLICATIONS**

Share evidence-based knowledge through ONS journal articles and books. Writing articles and blogging on the national level will elevate your institution's profile and give your nurses a sense of accomplishment.

### **LEADERSHIP**

Encourage your nurses to seize opportunities from the chapter and national level to board representation. They'll find opportunities to further the profession through publications, peer reviews and mentorship.

### **QUALITY MEASURES**

Elevate your patient outcomes through measurement. The Oncology Qualified Clinical Data Registry is a real time performance reporting tool with patient-centered quality measures that directly relate to practice.

### **ADVOCACY**

Share your institution's knowledge with our lawmakers to advocate for better laws that impact healthcare.

## **ONCOLOGY NURSING IS OUR WHOLE BUSINESS.**

We sort through the latest evidence, consult with experts in the field and nurses at the bedside to create resources on the topics most important to oncology nurses. Connect to our oncology nursing community and we'll work together to move cancer care forward.

ONS partners with cancer care providers like you every day. Each provider is a little bit different, so we start with you and your needs.

- **BULK DISCOUNTS.**

We'll find cost effective ways to provide courses, books, memberships, and possibly registrations to the annual ONS Congress to your staff.

- **ONS CONSULTATION SERVICES.**

Tell us about your institution, we'll find ways to help.

- **SITE VISITS.**

We'll come to you and meet with your nurses and administration.

- **LICENSING.**

ONS has a rich library of evidenced-based resources available for licensing. These resources should be considered for integration into training curriculums, policies and procedures and your nurse resource tools.
