

2023 Peer Review Application

ons.org/books

dburns@ons.org

The Oncology Nursing Society's book publication department is recruiting peer reviewers. These valuable volunteers ensure the quality and relevancy of chapters accepted for publication.

Peer review candidates are experienced clinical oncology nurses; master's degree or higher is the preferred (but not required) academic background. Peer reviewer expertise covers broad clinical oncology nursing competencies, advocacy, and influence (e.g., prevention, clinical assessment, treatment, symptom management, clinical models for patient care delivery, clinical operations, psychosocial support of patients and caregivers).

When reviewing chapters, reviewers provide constructive critiques, which evaluate content accuracy and whether it advances the foundation of clinical oncology nursing practice, writing clarity, and applicability of content to current clinical oncology practice. Reviewers are expected to complete and submit their reviews in 2 weeks. Reviewers maintain confidentiality of all content.

Please email your completed application and your CV or resume to dburns@ons.org for review.

Select your primary background:

Clinical oncology nursing

Academia

Other (Please specify: _____)

How many years have you worked in the following roles?

Clinical nursing: _____ Clinical oncology: _____ Faculty: _____

Other (please specify: _____)

Briefly state why you are applying for a position as a peer reviewer.

Please state your experience with the following in the past five years: reviewing (name of book and/or journal), professional writing or presentations relating content about clinical oncology care and oncology nursing practice.

Please check a **maximum** of 15 topics of areas of expertise. Choices should reflect your setting, your usual patient population, specific interests, and level of education. You do not need to be an expert in a topic to review chapters about it; however, you will be asked to offer your opinions based on your general understanding of the topic area.

Treatment

- Biotherapy/targeted therapies
- Chemotherapy
- Complementary and alternative therapies/integrative
- Drug delivery systems/devices
- Immunotherapy
- Infusion administration
- Oral therapies
- Radiation therapy
- Stem cell/marrow transplantation
- Supportive therapies (i.e., blood products, growth factors, and antibodies)
- Surgery

Symptom Management

- Adherence
- Anorexia
- Anxiety
- Caregiver strain and burden
- Cognitive impairment
- Constipation
- Depression
- Diarrhea
- Distress/stress
- Dyspnea
- Fatigue
- Hot flashes
- Lymphedema
- Marrow suppression
- Menopausal symptoms
- Mucositis
- Nausea and vomiting
- Neurotoxicity
- Pain
- Peripheral neuropathy
- Prevention of bleeding
- Prevention of falls and musculoskeletal injuries
- Prevention of infection
- Radiodermatitis
- Skin reactions
- Sleep/wake disturbances
- Symptom clusters

- Symptom science
- Wound/skin care

Disease-Specific Topics

- Breast cancer
- Gastrointestinal malignancies
- GU malignancies
- Gynecologic malignancies
- Head/neck malignancies
- Leukemia, lymphoma, hematology
- Lung cancer
- Multiple myeloma
- Neurologic malignancies
- Prostate cancer
- Sarcoma
- Skin cancer/melanoma

Cancer Programs

- Program development/evaluation
- Quality
- Safety

Professional Issues

- Burnout/compassion fatigue
- Communication (patient-provider)
- Education
- Healthcare and cancer care policies
- Interprofessional communication
- Management issues
- Navigation
- Nurse resilience/compassion fatigue
- Simulations and informal training
- Staffing

Dimensions of Cancer Experience

- BIPOC
- Cancer in older adults
- Cancer rehabilitation
- Cultural humility
- Distress management

- End of life/palliative care
- Ethics
- Financial aspects
- Inequities in clinical care
- Insurance issues
- Late effects of treatment
- LGBTQIA+
- Nutrition
- Pediatric patients
- Quality of life
- Sexuality/fertility
- Spirituality
- Survivorship

Other

- Acute clinical care
- Biology of cancer
- Carcinogenesis
- Clinical decision tools
- Clinical trials
- Continuity of care
- Economics
- Epidemiology
- Exercise/physical activity
- General med-surg topics
- Genetics and genomics
- Home care
- Multispecialty care
- Oncologic emergencies
- Patient/public education
- Patient-centered care
- Personalized medicine
- Prevention and detection
- Survivorship care plans
- Team-based care
- Treatment plans
