May 4, 2016

The Honorable William Thad Cochran  
Chairman  
Committee on Appropriations  
United States Senate  
Washington, D.C. 20510

The Honorable Barbara Mikulski  
Ranking Member  
Committee on Appropriations  
United States House of Representatives  
Washington, D.C. 20510

The Honorable Jerry Moran  
Chairman  
Subcommittee on Agriculture, Rural Development, Food and Drug Administration, and Related Agencies  
Committee on Appropriations  
United States Senate  
Washington, D.C. 20510

The Honorable Jeff Merkley  
Ranking Member  
Subcommittee on Agriculture, Rural Development, Food and Drug Administration, and Related Agencies  
Committee on Appropriations  
United States Senate  
Washington, D.C. 20510

Dear Chairman Cochran, Ranking Member Mikulski, Chairman Moran, and Ranking Member Merkley:

We are writing to express our strong opposition to two provisions in the House Agriculture, Rural Development, Food and Drug Administration, and Related Agencies appropriations bill for Fiscal Year 2017 that would significantly weaken the Food and Drug Administration’s authority over several tobacco products including e-cigarettes and cigars. One provision seeks to completely exempt certain cigars from FDA regulation. The other exempts e-cigarettes, cigars, and other currently unregulated tobacco
products from an important product review requirement, taking away a powerful and efficient tool to protect children from the candy- and fruit-flavored e-cigarettes and cigars that have flooded the market in recent years. We urge you to reject these House provisions and continue the Senate’s tradition of keeping its Appropriations bill clean of riders that limit FDA’s ability to protect children and public health from tobacco.

The need for FDA oversight of these products could not be clearer. On April 14 the Centers for Disease Control and Prevention released the 2015 National Youth Tobacco Survey, which highlighted that the alarming increase in youth use of electronic cigarettes continues. From 2011 to 2015, there was a more than ten-fold increase in current e-cigarette use among high school students – from 1.5 percent to 16 percent. In addition, high school boys now smoke cigars at a slightly higher rate than cigarettes – 11.5 percent for cigars and 10.7 percent for cigarettes. With three million middle and high school students using e-cigarettes and 1.4 million using cigars, the oversight of these products should not be weakened.

Section 749 of the House bill would block FDA from using funds to “finalize, implement, administer, or enforce” a pending rule that asserts authority over cigars, e-cigarettes, and certain other tobacco products unless that rule excludes “large and premium cigars” from FDA oversight. No tobacco product should be exempt from science-based FDA oversight. The health risks of cigars include several types of cancer, as well as heart and lung disease. In addition, the rider defines “large and premium cigars” so broadly that it could also exempt some cheap, machine-made, flavored cigars that are widely used by children. This exemption creates a loophole that invites tobacco companies to modify their products to qualify for this exemption – a loophole that tobacco companies will surely exploit to keep targeting children.

The House Appropriations Committee also adopted an amendment that changes the so-called “grandfather date” in order to exempt e-cigarettes, cigars, and other currently unregulated tobacco products from an important product review requirement. Under current law, manufacturers are required to provide information to the FDA so that the agency can assess the risks to public health of new tobacco products, which are defined as products introduced to the market after February 15, 2007. Changing this date would exempt e-cigarettes, cigars and other products now on the market from this FDA review and would significantly weaken FDA’s ability to take prompt action to protect children from thousands of fruit- and candy-flavored e-cigarettes and cigars, including products in flavors such as cotton candy, gummy bear and fruit punch that clearly appeal to kids.

Supporters of the “grandfather date” rider have portrayed it as a compromise that modernizes the Tobacco Control Act, but it is no such thing. This rider allows a new generation of tobacco products to be grandfathered in and relieves manufacturers of the responsibility to demonstrate that these products are not detrimental to public health.

Assessing the risks to public health of different types of tobacco products and determining how they are regulated is best determined using a science-based approach by FDA. Tobacco use remains the leading preventable cause of death in the United States and is responsible for an estimated $170 billion in
health care costs each year. We urge the Senate to reject any provisions to make it more difficult for FDA to address this public health problem.

Sincerely,
